

**What is WebDriver:**

WebDriver is an interface that is version 2.0 of selenium.

**How to invoke tests on browsers?**

All browsers have different classes to invoke test.

**All classes implement methods of WebDriver interface to enable the browsers to execute test cases.**

- FirefoxDriver
- ChromeDriver
- InternetExplorerDriver
- SafariDriver
- EventFiringWebDriver
- HTMLUnitDriver
- RemoteWebDriver

```
// Instantiate the webdriver  
WebDriver driver = new FirefoxDriver();
```

```
// Open the web application  
driver.get("http://www.google.com")
```
